

The PhD Course of Molecular Medicine is pleased to invite you to the Molecular Medicine PhD Retreat 2022 in the afternoon of 15<sup>th</sup> and the day of 16<sup>th</sup> June 2022 at the GALZIGNANO RESORT TERME & GOLF, Viale delle Terme, 84 – 35030 Galzignano Terme (PD) [www.galzignano.it](http://www.galzignano.it)

All of our students are required to attend the two days retreat whereby they have the opportunity to present their research to colleagues and faculty members, and profit from their experience. The format of the retreat has the aim to foster the interactions between young researchers working at different labs.

Students of 2<sup>nd</sup> and 3<sup>rd</sup> year will be asked to present a poster and to prepare a short talk (max 3 slides and 3 minutes) to introduce their work. Students will need to send their abstract (max 250 words) by **May 26**. The two best abstracts, one from the 2<sup>nd</sup> year and one from the 3<sup>rd</sup> year, will be selected to give a longer talk. There will also be a selection of the best poster.

The focus of the poster presentations will be mainly on describing the progress of the project, including both “ups and downs” and the current situation of each Ph.D. student of the second and third years within the program, rather than to present perfectly elaborated conference poster which, altogether, lead to a deeper understanding among all – “We are all in the same boat.” In the second day of the Retreat, students and faculty members are invited to a social event at the Catajo Castle.
